DETAILED ACTION

Response to Amendment

1. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was found to be convincing to the Examiner. Additionally, Applicant's amendment of claims 1, 12 and 23 corrects the problems noted in Paper No. 0304, mailed March 11, 2004, paragraphs 3 – 10 and accordingly, the rejection and objection to claims 1 – 14, 18 – 25, 27 and 28 based on 35 U. S. C. 102 (e) and 103 (a) is withdrawn.

EXAMINER'S AMENDMENT

- 2. In view of the allowable subject matter, the Applicant's representative was telephoned in order to amend claim 23 by adding a missing word for correct antecedent basis.
- 3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory E. Montone on July 14, 2004.

The application has been amended as follows:

In claim 23, line 13, following the phrase "... electrically insulating", insert - - layer - -.

Application/Control Number: 09/811,401 Page 3

Art Unit: 2829

Allowable Subject Matter

4. Claims 1 – 14, 18 – 25, 27 and 28 are now allowed.

5. The following is an examiner's statement of reasons for allowance:

Claims 1 – 14 and 18 – 22 recite, inter alia, a semiconductor device in which a protuberant portion is formed between the inclined edge portion and a flat portion of the stress relaxation layer and wherein the height of the protuberant portion is slightly higher than the height of the flat portion. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 23 – 25, 27 and 28 recite, inter alia, a semiconductor device in which a protuberant portion is formed between the inclined portion and a flat portion of the second electrically insulating layer and wherein the height of the protuberant portion is slightly higher than the height of the flat portion. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 09/811,401

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Asok K. Sarkar whose telephone number is 571 272

1970. The examiner can normally be reached on Monday - Friday (8 AM- 5 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Page 4

supervisor, Kammie Cuneo can be reached on 571 272 1957. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

8. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
